PROJECTS

Real time object detection using python

Jan 2026 - Apr 2026

Pravin Motors - Car Spare Parts Websites

Sep 2026 - Present

Pravin Motors – Car Spare Parts Website

Developing a web-based car spare parts website to showcase and organize automotive spare parts and make product information easily accessible to customers.

Key Features:

- Product listing and categorization of car spare parts
- Product details including name, price, and availability
- User-friendly and responsive interface
- Organized product browsing experience
- Automotive spare-parts focused website design

Technologies Used: HTML, CSS, Bootstrap

Role: Designed and developed the website interface and implemented the frontend layout and styling.
